

CUSTOMER FUNDING SOLUTION

High Secured offers a “Customer Funding Solution” (CFS) or “Corporate Payment System” where your Company can distribute funds worldwide to any number of clients, players, members, agents or employees. These funds are distributed through a flexible international card program.

With the CFS your Company can provide Maestro/Cirrus or MasterCard debit cards in USD and EUR to its clients, players, members, agents or employees in order to transfer funds to them for any type of payout due; i.e. winnings, salaries, commissions, dividends or other expenses. Companies who order a sufficient number of cards can have their Maestro/Cirrus or MasterCard “private branded” with their own Company name.

How Does the CFS Work?

1. Your Company would open a corporate bank account using a Panamanian Corporation through High Secured.
2. The bank would open sub-accounts for your company's members within 24 hours*
3. MasterCard or Cirrus/Maestro debit cards, PIN code and Internet Access Code are sent to the members.
4. Funds are internally transferred to sub-accounts and credited in real time.
5. Members have access to their funds via ATM and POS using their debit cards.

*Due Diligence documentation for sub-account holders should be submitted within 30 days of account opening. Each sub-account holder is asked to provide the bank with the following limited documentation to enable the opening of their account:

- A. A notarized copy of a valid and current passport (U.S. and Canadian Citizens are also asked to provide a notarized copy of their driver's license).
- B. A utility Bill in the name of the sub-account holder (as proof of physical address).

Who Can Use the CFS?

- Forex trading company investors
- On-Line Casinos and gaming websites
- Direct selling/multi-level marketing services
- Customers receiving regular payout from a specific company
- Affiliate and advertising networks
- Clubs (business clubs, frequent traveler's clubs, etc.)
